

Experience

Summer 2020: Software Developer Intern [ParaGroup-Israel](#) - Parametric and AI based solutions for the Design and Construction Industries. I was part of a big project across the group of re-writing a whole system from Python to C#.

2016 – 2018: Secret Service

Managed and coordinated schedules for 120 employees in the Special Forces Unit.

2015 - 2016: Head of the Israeli Ambassador's Office in Berlin.

Projects

City Route is an app that allows locals to build a tour around the city in which they live in for travelers who want the local experience in a city, by purchasing group tickets with price discount. In the app I have both Node.js server and client side based on react js using Material UI design system.

ParkAss a mobile app that reports drivers who parked in a disabled parking space without a handicapped/disabled parking permit. The app is written in React Native, using Google Maps for location and reporting. The reports are sent via WhatsApp to each municipality according to the location identified. Every report that is produced and sent is saved on Firebase.

Programming Proficiency

Full stack and web development – HTML | CSS | JavaScript | React | React Native - theoretical and practical knowledge and understanding of front end, server side and cloud engineering methodologies.

Education

2020: The web Developer Bootcamp Course (Udemy)

2020: Won a UI/UX form competition in 'Shenkar'

2018 - Present: Software Engineer at 'Shenkar' College of Engineering and Design, Ramat Gan.

Currently in my third year, Full-Stack Specialization.

Army Service

2013-2015: Secret Service -

Coordinated training sessions for 200 field managers and employees in Special Forces Unit.

Secretary of Head Department.
